# Stainless Steel Shelving Adjustable

We designed our adjustable shelving based on the time tested classic style.

Mount the uprights over studs or use our cleat hanger and position the slotted uprights anywhere. All components are industrial strength and made to handle extreme conditions.

Adjustable Bracket

The adjustable brackets install easily onto the uprights. Uprights should be screwed directly into wall studs to provide proper shelf support. Unique cam lock feature keeps the bracket firmly in place.

If wall stud availability is limited, our cleat hanger can be used. Simply screw the cleat hanger into studs, and snap the uprights onto the cleat hanger to provide proper shelf support.
